**For immediate release**

## CIMB successfully implements ANALEC's ResearchWise™ Suite

*Date: 25<sup>th</sup> September 2006*

CIMB Investment Bank Berhad, the investing banking arm of the second largest banking group in Malaysia, went "live" with ANALEC's integrated analytics-compliance-workflow management suite across their Asia Pacific brokerage and investment banking business. CIMB's acquisition of a regional stock broking franchise of GK Goh out of Singapore, in the middle of 2005, highlighted the challenges of managing a growing regional franchise and ANALEC's ResearchWise™ was seen as the preferred solution.

CIMB and ANALEC kept impressive time lines and were able to bring their multi-country research, sales & trading business to use the ResearchWise™ suite within a 5-month implementation time frame. The implementation process involved 36 CIMB analysts to migrate over 375 of their financial forecast models onto the ResearchWise™ platform, across 5 countries; customisation of over 90 report templates and Excel retrieval templates for automatic retrieval of content from the ResearchWise™ suite for publication purposes; customisation and set-up of the compliance interface for compliance management across their regional business. Given the present re-branding effort underway at CIMB, it also delivered a powerful customised web interface for financial content retrieval, branded to CIMB's new look-and-feel.

Commenting on the implementation process, Indy Sarker, CEO of Analec Infotech Private Limited said, "We have once again delivered a successful implementation of the ResearchWise™ platform across a multi-country operation, with significant positive feedback coming in from end-users. In a world of regulatory scrutiny and research cost challenges, our solution is increasingly seen as a way to address risk management and empower users to achieve greater efficiency, improved quality of output and superior client servicing standards."

ANALEC remains positively placed to grow its market presence in Asia and the United States, its chosen geographic focus areas. Presently, ANALEC has over 400 users for its ResearchWise™ suite, including over 80 research analysts. ANALEC's present deployments in Asia are all Enterprise-level in-house deployed solutions. Recently, ANALEC launched a Small Business Edition of its ResearchWise™ suite, offered in a fully-hosted ASP delivery model, opening the door to many small brokerages and research boutiques.
